

ANAND N

Aspiring DevOps Engineer | Python | Cloud Automation

+91 7306922640 | anandanand6776@gmail.com | linkedin.com/in/anand-n-anand-n | github.com/900Gang | Kerala, India

Professional Summary

Computer Science Engineering graduate with a strong foundation in Python, Git, Linux, and software development. Currently building practical knowledge in DevOps, including CI/CD, Docker, Jenkins, AWS, and virtual machines. Experienced in developing Python-based applications and integrating real-time IoT systems with cloud services using Firebase. Strong understanding of software development fundamentals, problem-solving, and collaborative development, with a strong interest in DevOps and cloud engineering.

Technical Skills

- **DevOps:** Linux, CI/CD, Docker (Learning), Jenkins (Learning), AWS (Learning), Virtual Machines
- **Version Control:** Git, GitHub
- **Programming:** Python, SQL, JavaScript
- **Cloud & Databases:** AWS (Learning), Firebase Realtime Database, MySQL
- **Web Technologies:** HTML, CSS, React
- **Frameworks & Runtime:** Django, Node.js (Learning), Express.js (Learning)
- **Testing:** Manual Testing (Learning), SDLC, STLC, Test Case Design, Bug Reporting, Defect Life Cycle
- **Core Concepts:** Operating Systems, Computer Networks, DBMS, Data Structures, OOP, REST APIs, JSON, Agile

Projects

Early Identification of Learning Disabilities Using AI and IoT

Technologies: Python, ESP32, Firebase, Git, IoT, REST APIs

[Source Code](#)

- Developed the Python backend for processing real-time physiological and behavioral sensor data.
- Integrated ESP32 with MPU6050 and MAX30100 sensors using I2C communication.
- Built a real-time data pipeline to transmit sensor data to Firebase Realtime Database.
- Worked with Git and GitHub for source-code management and collaborative development.
- Collaborated with a four-member team on system integration, debugging, testing, and deployment.

AI-Driven Clinical Support for Hematology Screening

Technologies: Python, TensorFlow, Keras, CNN, OpenCV, Git

[Source Code](#)

- Developed a Python-based machine learning application for automated blood smear classification.
- Prepared and processed image datasets for model training and evaluation.
- Implemented a Python prediction pipeline for automated disease classification.
- Used Git and GitHub for source-code management and project collaboration.
- Tested and evaluated the application through iterative experimentation.

Education

Bachelor of Technology (B.Tech) in Computer Science Engineering

2022 – 2026

College of Engineering, Muttathara

CGPA: 6.84

- Relevant Coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Software Testing, Data Mining.

Higher Secondary Education (Class XII)

2018 – 2020

Sree Narayana Guru Higher Secondary School

CGPA: 8.8

Secondary Education (Class X)

2017 – 2018

Sree Narayana Public School

CGPA: 8.2

Certifications

- Python for Data Science — NPTEL
- Python Bootcamp — Udemy
- Basic to Advanced SQL — Skill Nation

Professional Skills

Problem Solving • Communication • Team Collaboration • Quick Learner • Adaptability • Time Management • Critical Thinking
